Certification of Monument Data is an extremely important form. To ensure accuracy, we request that the form be completed by the next of kin. Additional inscriptions (AI's) are limited to the same side of the stone as decedent's inscription data. In most cases, two lines are available with 15 letters and spaces per line. AI's are inscribed below the mandatory inscription items, space permitting. The request for an AI must be placed in remarks section of the Certification of Monument Data. Family's choosing an AI after the headstone has been ordered will incur additional expense.
